Mason-Lite Accessories

- Masonry Arch
- Masonry Chimney
- Mason-Lite Rumford Height Kit
- Masonry Firebrick Panels
- Damper Blocks
- Metal Base
- High Temperature Mortar

**Masonry Arch**
This Arch Kit consists of two pieces that are easily mortared in place to give that custom look to the fireplace. The Masonry Arch is an extra piece that you can buy with your unit to add that custom feel.

**Masonry Chimney**
This Masonry Chimney is comprised of two pieces: an inner liner section with a 14" diameter flue and an outer liner section. Inner and outer liners must be ordered together to function properly. We also offer both 4' and 8' systems. Other Chimney components that are offered are the Inner Liner Starter Section, the Offset Elbow Section, and Brick Ledge.

**Mason-Lite Rumford Height Kit**
This Height Kit consists of a rear wall and two side walls that will increase the height opening by 8" from the standard opening (giving a Rumford look). With the new size opening be sure to check the Chimney Size Chart to ensure proper flu size.
High Temperature Mortar

Each of our standard Firebox Kits comes with a 50 lb. bucket of dry mortar. Each of these kits should come with plenty of mortar to install the firebox itself. If you are installing one of our brick panel kits or other masonry accessories you may need to purchase more high-temperature mortar for installation.

Metal Base

This Metal Base is used for installation of Mason-lite fireplaces to offer the air clearance necessary for installation on combustible floors. Check out the Hearth Rebar Locations to ensure proper stability.

Damper Blocks

Mason-Lite Damper Blocks come as three masonry blocks that are designed to lift a traditional vestal damper so that it fits our standard Masonry Fireplaces.

Masonry Firebrick Panels

Our Masonry Firebrick Panels are easy to install, they come in full running bond or split herringbone. The set consists of two sides, a back and a bottom. We also offer a taller firebrick panel kit to fit the needs of a Rumford style Fireplace. Standard installation time is under an hour.
