TOSCANA Wood Fired Pizza Oven

The perfect addition to your own outdoor kitchen. The Mason-Lite Toscana Wood Fired Pizza Oven brings ease to both the installation and operation of an outdoor masonry pizza oven. The Toscana Pizza Oven will give you the ability to cook your own mouth-watering custom pizzas in the privacy of your own backyard.

Mason-Lite is built on helping homeowners realize their dream of installing true masonry hearth products, without the cost and complexity of traditional masonry construction. The Toscana Wood Fired Pizza Oven continues this tradition as a prefabricated, refractory modular wood fired oven designed for field assembly. The system consists of interlocking precast components which adhere together with masonry mortar.

The pizza oven can be finished to owners preference: stucco, rock, tile, brick, etc.

Important: If optional Mason-Lite wood storage is not used, then the Toscana Wood Fired Oven requires a base below the table top version that is non-combustible with no wood underpinnings. Said base, would need to support the 648 lbs. of the Toscana Oven as well as any finishing materials.

*Optional Powder Coated Steel Door
