OUR LIGHTWEIGHT, GAS-BURNING MASONRY FIREPLACES ARE TAKING THE HEARTH INDUSTRY BY STORM.

Complete with realistic logs, a remote control, and safety features, these fireplace systems are attractive on or off and have superior thermal output.

Available in 39”, 44”, 49” units, as well as a 43” See Through unit, our B-vent systems add value and elegance to a home without the mess and hassle of old-fashioned, wood burning fireplaces.

B-Vent Gas-Burning Series

Designed for easy, multi-floor installations, our lightweight masonry fireplace systems meet all necessary U.S. building codes for outdoor/indoor construction.

Features and Benefits:

• A fireplace system complete with a set of R.H. Peterson “Real-Fyre” realistic gas logs, designed with rich detail to replicate the natural beauty of wood

• Clean and Environmentally Friendly: Gas-burning fireplaces have lower outputs of carbon monoxide, pollutants, and particulate matter compared to wood-burners

• Convenient, No-Mess Operation: Free from sparks and long-burning embers, no chimney cleaning, no messy ashes or wood chips, no wood storage space needed

• Superior Warmth in four Sizes:*  
  MGFP39  (39”): 65,000 BTU’s (natural gas)  
  MGFP44  (44”): 65,000 BTU’s (natural gas)  
  MGFP49  (49”): 80,000 BTU’s (natural gas)  
  MGFPST43 (See Thru) (43’): 90,000 BTU’s (natural gas)  
*Also Available for Propane

• Smaller Flue for reduced framing requirements. Architects love it!

• Compliant with ANSI Z 21.50 gas fireplace standard

• Handheld remote control for turning the gas on or off

• Electronic ignition with battery backup

• Safety shutoff feature for fail-safe operation

• Utilizes industry standard 10” B-Vent chimney, (12” for See Through)

• Optional firebrick colors and patterns for an authentic fireplace look-and-feel

Optional Mason-Lite Brick Panels

Full Running Bond  
Split Herringbone
