TOSCANA Wood Fired Pizza Oven

The perfect addition to your own outdoor kitchen. The Mason-Lite Toscana Wood Fired Pizza Oven brings ease to both the installation and operation of an outdoor masonry pizza oven. The Toscana Pizza Oven will give you the ability to cook your own mouth-watering custom pizzas in the privacy of your own backyard.

Mason-Lite is built on helping homeowners realize their dream of installing true masonry hearth products, without the cost and complexity of traditional masonry construction.

The **Toscana Wood Fired Pizza Oven,** continues this tradition as a prefabricated, refractory modular wood fired oven designed for field assembly. The system consists of interlocking precast components which adhere together with masonry mortar.

The Pizza Oven includes the inner firebrick panels, and the outside can be finished to any preferred non-combustible materials.

Important: Due to heat and weight issues, the Toscana Wood Fired Oven, Table Top version installation requires a non-combustible base with no wood underpinnings, and prepared custom base to handle the Toscana Oven 684 lbs. with optional base support weight 580 lbs. for a total of 1,264 lbs.
