How to Choose a Fireplace System

Choose Confidently

MASON-LITE

A simple checklist for homeowners and builders

Choose Confidently:

The 5 Things That Matter

When you're selecting a fireplace system, ignore the noise and focus on what impacts the finished result:

1. **Application Fit**
   Is this a new build or remodel? Where will the fireplace live in the home?

2. **Installation Realities**
   What are the space constraints, chase plan, and build schedule?

3. **Performance Expectations**
   How do you want to use the fireplace—everyday enjoyment or occasional ambiance?

4. **Design Goals**
   What opening size and style are you after? Do you want a bold statement feature?

5. **Support & Documentation**
   Does the system come with clear install guidance and a support path if questions come up?

Quick Project Info Checklist

Bring This to Your Dealer/Builder

- New build or remodel
- Room location + wall type
- Desired opening size / overall look
- Preferred finish (stone/brick/surround)
- Timeline and builder contact
